

Tracers with AMP[®] Enhancements

We are committed to delivering a robust platform that streamlines your ability to collect the right data to make informed patient safety and quality decisions. That is why we make listening to your needs a priority. During the past year, we implemented several new enhancements that will help you meet your patient safety and quality goals. Through Tracers with AMP[®] you can now:

Expanded data collection supports risk assessment

New question types, in addition to Compliant/Noncompliant responses, are now available in Tracers with AMP. Users have the option to exclude responses from compliance reporting and the option to collect “Additional Information” to support question responses. Go beyond accreditation readiness activities into digital rounding with this new feature!

Here are the available question types a Program Administrator can use when creating tracers:

Get a cohesive picture of actionable data and draw critical connections by importing JCR mock survey findings

With a few clicks in our platform, the findings entered during your JCR mock surveys can populate into Tracers with AMP for reporting. JCR Mock Survey Findings will populate into the Organization Documentation section of Standards and Scoring; the data will also be available in the Standards Reports as well as Illuminate Analytics[™]. Click [here](#) for additional information on how to download your JCR mock survey findings.

Tracers schedule and assignment enhancements

The addition of Tracers site-level scheduling will enable leaders to deploy and manage the Tracers program from the system or regional levels. Leaders may assign, communicate, and monitor expectations for each organization for the number and frequency of Tracer observations.

Score and monitor compliance as well as enter plans of correction for Life Safety Code[®] (K-tags)

If your organization subscribes to the CMS add on available with the Tracers platform you can now link K-tags to existing tracer questions or create new tracers using the new Life Safety Code templates. A new Life Safety Code Compliance dashboard is available in Illuminate Analytics[™]. This dashboard will provide you the overall compliance by K-tag using the data entered in your Tracers observations. See figure B.

Tags		Regulations	Individual Compliance	Final Compliance
Bulk Update Assignments Create Task		K-tags		
K100	General Requirements - Other List in the REMARKS section any LSC Section 18.1 and 19.1 General Requirements that are not addressed by the provided K-tags, Read More	Not Assigned	07/24/2020	
K111	Building Rehabilitation Repair, Renovation, Modification, or Reconstruction Any building undergoing repair, renovation, modification, or reconstruction Read More	Not Assigned	07/24/2020	
K112	Sprinkler Requirements for Major Rehabilitation If a nonsprinklered smoke compartment has undergone major rehabilitation the automatic sprinkler requirements Read More	Not Assigned	07/24/2020	
K131	Multiple Occupancies - Sections of Health Care Facilities Sections of health care facilities classified as other occupancies meet all of the following: - Read More	Not Assigned	07/24/2020	
K132	Multiple Occupancies - Contiguous Non-Health Care Occupancies Non-health care occupancies that are located immediately next to a Health Care Occupancy, but Read More	Not Assigned	07/24/2020

Access Joint Commission Benchmarking Data through Illuminate Analytics™

You can access the following Joint Commission published data through the JCR integrated dashboards in Illuminate Analytics™:

- SAFER™ Matrix values of all full and initial surveys conducted in the hospital program
- The top 10 high risk EPs cited for all accreditation programs from full and initial surveys

Assess your organization's preparedness for COVID-19

A new suite of COVID-19 tracer templates are available to help you assess your processes to minimize exposure and to monitor infection prevention and control activities.

ENHANCEMENTS COMING SOON

Your data, your way through an API interface

An API (interface) will be made available to all customers to create an automated process to securely transfer selected Tracers with AMP data on a regular basis to their data warehouses.

More Joint Commission data available in your platform

You will be able to download your Evidence of Standards Compliance (ESC) and view multiple cycles of Requirements for Improvement (RFI) data for the past 3 years.
